16th Wind Integration Workshop

International Workshop on Large-Scale Integration of Wind Power into Power Systems as well as on Transmission Networks for Offshore Wind Power Plants

25 - 27 October 2017 | Berlin, Germany
Welcome…

to the 16th International Workshop on Large-Scale Integration of Wind Power into Power Systems as well as on Transmission Networks for Offshore Wind Power Plants

We have come a long way from the first edition of the workshop at the Royal Institute of Technology in Stockholm, Sweden in 2000 and we have almost come full circle. Let me seize this opportunity to announce that next year’s Wind Integration Workshop will go back to its roots. Mark your calendars and save the date for the 17th Wind Integration Workshop in Stockholm, Sweden from 15 – 19 October 2018!

17 years, with 15 Wind Integration Workshops under my belt, have been filled with many great experiences and I am looking forward to the 16th Wind Integration Workshop in Berlin, Germany. This venue gives us the opportunity to re-visit one of our most popular conference cities. I am sure that this time around we will have as many exciting and eye-opening moments as we had at our last Berlin Conference in 2014. Yet, this is also a good moment to reflect on how times and circumstances change. Over the past years, we have always succeeded in reflecting the shifting focuses in the area of wind integration. This way, the workshop has developed into a renowned international platform for discussing the subject of grid integration of wind power into existing power systems.

Another way for Energynautics as an organizer to go with the times is to take our participants’ wishes and suggestions into account and offer a wider range of topics when it comes to RE grid integration. In October 2011, on the occasion of the 10th International Wind Integration Workshop the conference was held in conjunction with the Solar Integration Workshop for the first time. That conference is by now celebrating its 7th edition. This year we take the next step towards a comprehensive yet diverse RE conference experience and commemorate the first edition of the E-Mobility Power System Integration Symposium as we feel it necessary to discuss the impact of a larger share of EVs in transportation on the grid.

I am sure it is one of our shared goals to contribute with our work to assisting the goals outlined in the Paris Agreement. Yet, several studies show that with the current commitments, the probability of keeping the increase in global average temperature below 2 °C is only 5%. We need to do even more to increase that probability and to give our planet a fair chance!

One goal that many countries have committed to apart from integrating a larger share of renewable energies is to also decrease Greenhouse emissions in the transport sector substantially by increasing the share of electric mobility. Yet, E-Mobility can only be considered a sustainable climate protection measure if vehicles are charged with power from renewable energies. Otherwise, emissions are only shifted to the location of the generation plants. New questions and challenges arise regarding the grid integration of a larger share of fluctuating power supply from renewable energies. Energynautics reflects this correlation with its new Workshop Setup and offers three conferences in one week that go hand in hand. The newly established Berlin Workshop Week offers many combination opportunities for its participants to account for the inherent synergies of the conference topics.

The programs of the Wind and Solar Workshops for example are especially designed to include sessions that are suitable for both interest groups on the shared Wednesday, like the IEA session "Recommended Practices for Wind / PV Integration" (IEA Tasks 14 and 25) or the ENTSO-E session "System Challenges & Solutions to Move Towards 100% RES Penetration". Another highlight in our Wind program is the session on the Black Out in Australia that is being discussed for the first time in detail in Europe. Another recurring focus of this year’s workshop will be ancillary services. Due to last year’s great feedback we offer the Wind Tutorial “Ancillary Services and Wind Power Plants: Status and Experiences” again on 24 October 2017. Make sure to check out the conference programs for those presentations that are most interesting to you and your line of work.

I would like to thank you all for making the Wind Integration Workshop to what it has become over the years: a great communion of like-minded researchers, economists and practicing engineers from different fields relating to wind power and transmission systems. Exchanging knowledge and discussing experiences in the area of large-scale integration of wind power into power systems and transmission networks for offshore wind power plants: that’s what we do at the workshop. I would also like to welcome all our new participants and tell you: you have come to
the right place to immerse yourselves in the area of wind power integration. Brace yourselves for an exciting mix of both theoretical discussion and practical applications!

While bringing people together has always been the workshop’s purpose, it is our guests’ participation, their papers and their presentations that fill the frame we set with life. In 2000, we started with 4 sessions in total – this year we received such a large number of outstanding abstracts that we can offer again a two-and-a-half day program with 25 sessions.

We work hard at these Workshops, but it is very important to me personally to give our participants the time to mingle and network in a more casual setting as well. That is why the Wind Integration Workshop offers Accompanying Events such as the combined Solar and Wind Dinner (25 October 2017) that will take place at the Wasserwerk, a former water works facility. It is the perfect opportunity to mingle with both solar and wind experts. On Thursday, the spotlight will be on our poster presenters. Researchers and practitioners present their projects in poster sessions during the Workshop and at the especially dedicated Poster Reception on 26 October 2017. This Networking Event is a platform for poster presenters to showcase their findings and discuss them with workshop participants in a casual get-together. I encourage you to make good use of these unique educational and networking opportunities!

The most interesting papers from the Solar and Wind Workshops will again be published in a Special Edition of the *IET Renewable Power Generation (due late 2018)*. Because of the high interest in the workshop proceedings, we will again submit this year’s proceedings to international libraries and organizations who operate citation index systems such as the (i) FIZ – Fach Informations Zentrum Karlsruhe, (ii) Elsevier, (iii) ETDE, (iv) Reuters, (V) Compendex, (Vi) Thomson Citation Index so that the proceedings are more easily available for academia and industry worldwide.

The 16th Wind Integration Workshop would not be possible without our sponsors and we would like to thank them for their support. Our Tera Sponsor this year is: the wind turbine manufacturer **ENERCON** (Germany), our Giga Sponsors: the Transmission System Operator **TenneT** (Germany), the consulting and software company **DigSILENT** (Germany), the energy group **DONG Energy** (Denmark), the wind turbine manufacturer **Siemens Gamesa** (Denmark) and the wind turbine manufacturer **Vestas** (Denmark).

In addition, the workshop is supported by Wind Europe (Belgium), the IET Digital Library (United Kingdom), the Renewables Grid Initiative (Germany), HTW – Hochschule für Technik und Wirtschaft Berlin (Germany), ENTSO-E (Belgium), UVIG – Utility Variable Generation Integration Group (USA) and the European Energy Students Network (EESN) as well as the media partners Offshore Wind Industry (Germany), Sun & Wind Energy (Germany), WindTech International (Netherlands), SmartGridSpain (Spain), et - Energiewirtschaftliche Tagesfragen (Germany), and the LinkedIn Group “Energy Storage Demand Response and Grid Technologies”.

I would also like to thank all those who supported the organizers of this workshop: all the members of the International Advisory Committee as well as Uta Betancourt, Ines Drewianka, Elke Müller, Anke Ost and Elvan Varvoda (all Energynautics, Germany).

Enjoy some inspiring days in Berlin and seize the numerous networking opportunities!

*Thomas Ackermann*

**Energynautics**

PS: Comments are always welcome, feel free to contact me at: t.ackermann@energynautics.com

1 The first special edition based on the 2013 Workshop was published in January 2015 (Volume 9, Issue 1), the special edition from the 2014 Berlin Workshop was published in January 2016 (Volume 10, Issue 1), and the special edition from the 2015 Brussels Workshop was published in February 2017 (Volume 11, Issue 3), see [http://digital-library.theiet.org/content/journals/iet-rpg](http://digital-library.theiet.org/content/journals/iet-rpg)
# Table of Contents

**Session 1 – Keynote Session:**

- Grid Stresstest – Outcome and Further Options  
  C. Siebels (TenneT TSO, Germany)

- North Sea Wind Power of the Future  
  M. van der Meijden (TenneT TSO, Netherlands)

- Social Acceptance is the Achilles’ Heel of the Energy Transition  
  L. Hartman (TenneT TSO, Germany)

**Session 2A: ENTSO-E: System Challenges & Solutions to Move towards 100% RES Penetration**

- Present status of European Wide Guidance from ENTSO-E on HPoPEIPS  
  J. Jahn (Tennet, Germany)

- Implications of High Penetration of Power Electronic Interfaced Sources on Power System Analysis  
  B. Weise (DiGSIENT, Germany)

- Wind Industry Input on Issues in Dealing with High Penetration Challenges  
  Wind Europe / P. Christensen (Vestas, Denmark)

- Possible Ways Forward for Solar PV Contribution to Coping with Impact of High Penetration  
  T. Buelo (SMA, Germany)

**Session 2B: IEA Task 14 and Task 25: Recommended Practices for Wind /PV Integration Studies**

15:40 – 18:00 / 25 October 2017 / Room Alexander 2 / Session chair: J. C. Smith (UVIG, USA)

- Getting Wind and Solar onto the Grid – An IEA Manual for Policy Makers  
  S. Mueller, P. Vithayasrichareon (International Energy Agency, France)

- Recommendations for Wind and Solar Integration Studies  
  H. Holttinen, J. Kiviluoma (VTT, Finland), T. K. Vrana (SINTEF, Norway), E. Neau (EdF, France), D. Flynn, J. Dillon (UCD, Ireland), L. Söder (KTH Royal Institute of Technology, Sweden), N. Cutululis (DTU, Denmark), B. Mather, B.-M. Hodge (National Renewable Energy Laboratory – NREL, USA), K. Ogimoto (University of Tokyo, Japan), J. C. Smith (UVIG, USA)

- IEA PVPS Recommended Practices for Wind/PV Integration Studies – Focus on PV Integration  
  R. Bründlinger, Ch. Mayr (AIT, Austria)

- Transmission Grid and System Dynamics: Recommended Practices for Wind/PV Integration Studies  
  D. Flynn (University College Dublin, Ireland), H. Holttinen (VTT, Finland)
Session 2C: HVDC Issues

15:40 – 18:00 / 25 October 2017 / Room Alexander 3 / Session chair: TBA

Interaction Analysis between MMC-Based VSC-HVDC Links and DFIG-Based WPPs within the AC Network
E. Prieto-Araujo, E. Sánchez-Sánchez, S. Galceran-Arellano, O. Gomis-Bellmunt (Polytechnical University of Catalonia, Spain)

Auxiliary Power Supply in a FixRef Controlled Offshore Wind Power Plant with Diode Rectifier HVDC Transmission
C. Neumann, H.-G. Eckel (University of Rostock, Germany), S. Achenbach, F. Augsburger (Siemens, Germany)

Offshore Wind Farms and HVDC Grids Modelling as a Feedback Control System for Stability Analysis
A. Bidadfar, O. Saborío-Romano, M. Altin, Ö. Göksu, N. A. Cutululis, P. E. Sørensen (DTU, Denmark)

Harmonic Resonance Interactions in HVDC-Connected Offshore Wind Power Plants
M. Cheah-Mane, E. Prieto-Araujo, O. Gomis-Bellmunt L. Sainz (Polytechnical University of Catalonia, Spain)

Harmonic Stability and Interactions in Meshed VSC-HVDC Dominated Power Systems
A. J. Agbemuku, J. L. Dominguez-Garcia (Catalonia Institute for Energy Research – IREC, Spain), E. Prieto-Araujo, O. Gomis-Bellmunt (Polytechnical University of Catalonia, Spain)

Transient Stability Enhancement by Active/Reactive Power Control of Hybrid HVDC in the Egyptian Power Grid with Wind Power Integration
H. Aboelsoud, T. Tsuji (Yokohama National University, Japan)

Session 3A: Harmonics I

09:00 – 11:00 / 26 October 2017 / Room Alexander 1 / Session chair: T. Lund (Vestas, Denmark)

Impedance Modelling and Simulation of Wind Turbines for Power System Harmonic Analysis
J. Sun (Rensselaer Polytechnic Institute, USA), C. Buchhagen, M. Greve (TenneT Offshore, Germany)

Large Scale Investigation of Harmonic Summation in Wind- and PV-Power Plants
F. Ackermann, M. Moghadam, S. Rogalla (Fraunhofer-ISE, Germany), F. Santjer (UL International [DEWI], Germany), I. Athamna (FGW, Germany), R. Klosse (WindGuard Certification, Germany), K. Malekian (Technical University of Chemnitz, Germany), A. Adloff (WRD Wobben Research and Development, Germany), M. F. Meyer, G. Kaatz, D. Schulz (Helmut Schmidt University, Germany), A. Bitz, N. Schaefer (Fraunhofer IWES, Germany), B. Fricke (M.O.E., Germany), M. El Ghouti (DNV-GL, Germany)

Harmonic Emission of Wind Turbines and PV Inverters
F. Santjer, S. Tentzerakis, K. Nolopp, M. Baerschneider, R. Foreman (UL International [DEWI], Germany), K. Malekian, F. Safargholi (Technical University of Chemnitz, Germany), S. Adloff (WRD Wobben Research and Development, Germany), I. Athamna, M. Muehlberg (FGW, Germany), M. F. Meyer, M. Jordan, D. Schulz (Helmut Schmidt University, Germany), F. Ackermann (Fraunhofer ISE, Germany)

Wind Power Plant Transmission System Modelling for Harmonic Propagation and Small-signal Stability Analysis
Ł. Kocewiak (DONG Energy Wind Power, Denmark), B. Gustavsen, A. Holdyk (SINTEF Energy Research, Norway)

Sideband-Harmonic Instability of Paralleled Inverters with Asynchronous Carriers
D. Yang X. Wang, F. Blaabjerg (Aalborg University, Denmark)

Session 3B: Ancillary Services and Markets

09:00 – 11:00 / 26 October 2017 / Room Alexander 2 / Session chair: J. Matevosyan (ERCOT, USA)

Market Mechanisms for Frequency Control
T. George (DiSILENT Pacific, Australia), S. Wallace (SW Advisory, Australia), S. A. Hagaman (DiSILENT Pacific, Australia), H. Mackenzie (HARD software, Australia)

Ancillary Services Provision with Wind Power Plants in Spain and its Coordination with Congestion Management
M. Sánchez Llorente, R. Fernández-Alonso López, M. de la Torre Rodríguez, J. Bola Merino (Red Eléctrica de España – REE, Spain)

Storage Technologies for Enabling Grid-tied Renewable Energy Sources to Grid ancillary Services Supply: a Successful Case
A. Tizzanini, L. Rambaldi, L. Lanuzza, D. Consoli, F. Bizzarri, A. De Cristofaro, F. Fioretti (Enel Green Power, Italy)

Short Term Forecasting of Wind Power Plant Generation for System Stability and Provision of Ancillary Services
H. Mackenzie, J. Dyson (Dispatch Solutions, Australia)

Review of regulated Ancillary Service Market in India
S. Sharma (GIZ India, India), A. Nandy (Solar Energy Corporation of India, India)
Session 3C: Offshore Wind Integration
09:00 – 11:00 / 26 October 2017 / Room Alexander 3 / Session chair: M. N. Frydensbjerg (Vattenfall Vindkraft, Denmark)

The Grid behind LCOE
M. Kuijpers (Tennet, Netherlands)

Fault Ride–Through of Unbalanced AC Grid Faults in HVDC–Connected Offshore Wind Power Plants
K. Schönleber (GE, Spain), E. Prieto Araujo, O. Gomis-Bellmunt (Polytechnical University of Catalonia, Spain)

Harmonic Active Filtering and Impedance-based Stability Analysis in Offshore Wind Power Plants
D. Dhua, G. Yang, Z. Zhang, (DTU, Denmark), L. Koczwak, A. Timofejevs (DONG Energy Wind Power, Denmark)

Parameterization and Dynamic Analysis of Coordinated Voltage Control for Offshore Wind Power Integration
V. Akhmatov (Energinet.dk, Denmark), Q. Wu, A. Kotsonias, J. M. Røge (DTU, Denmark)

Black Start and Island Operation Capabilities of Wind Power Plants
Ö. Göksu, O. Saborio-Romano, N. Cutululis, P. Sørensen (DTU Wind Energy, Denmark)

Session 4A: Compliance Testing
11:30 – 13:00 / 26 October 2017 / Room Alexander 1 / Session chair: E. Tröster (Energynautics, Germany)

Overview of Actual Development and Discussions of Electrical Certification of Wind Turbines on Test Benches
T. Jersch, C. Mehler, M. Neshati (Fraunhofer IWES, Germany)

A Test-bed System for Validation of Ancillary Services of Wind Power Plants under Realistic Conditions
A. Kissner, M. Engel, L. Rezai, M. Andrejewski, J. Fortmann, H. Schulte (University of Applied Sciences (HTW) Berlin, Germany)

Setting Standards – Perspectives for Future Energy Grids
S. Kossler (DKE German Commission for Electrical, Electronic & Information Technologies of DIN and VDE, Germany)

Session 4B: Review of the South Australia Black-Out
11:30 – 13:00 / 26 October 2017 / Room Alexander 2 / Session chair: T. Ackermann (Energynautics, Germany)

Analysis of the South Australian Black-out
B. Badrzadeh (AEMO, Australia)

Lessons Learnt From the Australian Frequency Control Ancillary Service Market
K. Summers, R. Jennings (Pacific Hydro, Australia), J. Peters (Monash University, Australia)

Integration of Non-Synchronous Generation into the Australian National Electricity Market
J. Eggleston (Australian Energy Market Commission – AEMC, Australia)

Session 4C: International Studies
11:30 – 13:00 / 26 October 2017 / Room Alexander 3 / Session chair: TBA

Modelling and Analysing Future Energy Systems with High Shares of Variable Renewables – a South African case study
K. Knorr, B. Zimmermann, S. Bofinger (Fraunhofer IWES, Germany), C. Mushwana, T. Bischoff-Niemz (Council for Scientific and Industrial Research – CSIR, South Africa)

Quantifying the Benefits of Wind Power Diversity in New Zealand
D. McQueen A.Wood (University of Canterbury, New Zealand)

Evaluating the Impacts of Priority Dispatch Rule on Renewable Energy Curtailment in Japan
T. Wakeyama (Renewable Energy Institute, Japan)
Session 5A: Market, Economic & Regulatory Issues
14:00 – 15:50 / 26 October 2017 / Room Alexander 1 / Session chair: D. Flynn (University College Dublin, Ireland)

The Effect of Wind Generation on Wholesale Electricity Prices in Ireland
R. Kernan, X. Liu, S. McLoone, B. Fox (Queen's University Belfast, United Kingdom)

Smart Markets as an Efficient Concept to Address Network Congestion in Regions with High Penetration Levels of Wind Power
M.-L. Arlt (University of Freiburg, Germany), M. Doering, C. Nabe (Ecofys, Germany), S. Ropenus (Agora Energiewende, Germany), K. Burges (Ecofys, Germany)

Simulation Analysis of Wind Power Integration in Isolated Grids: a Case Study
I. Di Fresco, J. Radcliffe, Y. Ding (University of Birmingham, United Kingdom)

German Paradox Demystified: Why is Need for Balancing Reserves Reducing despite Increasing VRE Penetration?
R. Kuwahata, P. Merk (Elia Grid International, Germany)

Session 5B: Grid Integration Studies I
14:00 – 15:45 / 26 October 2017 / Room Alexander 2 / Session chair: J. C. Smith (UVIG, USA)

Comparison of Integration Studies of 30-40 Percent Energy Share from Variable Renewable Sources
L. Söder (KTH Royal Institute of Technology, Sweden), M. Milligan (National Renewable Energy Laboratory – NREL, USA), A. Orths (Energinet.dk, Denmark), C. Pellinger (Forschungsstelle für Energiewirtschaft, Germany), J. Kiviluoma (VTT, Finland), V. Silva, M. Lopez-Botet Zulueta (EDF, France), D. Flynn (University College Dublin, Ireland), B. O’Neill (National Renewable Energy Laboratory – NREL, USA)

U.S. Interconnections Seam Study and the North American Renewable Integration Study
J. Novacheck, G. Brinkman, A. Bloom (National Renewable Energy Laboratory – NREL, USA)

Reducing Power System Expansion Problems via Variable Parameterization
B. U. Schyska (University of Oldenburg, Germany), P. Pinson (DTU, Denmark), A. Kies (Frankfurt Institute for Advanced Studies, Germany), L. von Bremen (University of Oldenburg, Germany)

Novel Node Selection Approach for Continent-Wide Power System Studies Using Spatio-Temporal Clustering
M. Krutova, L. von Bremen (University of Oldenburg, Germany), S. Chatzivasileiadis (DTU, Denmark)

Session 5C: Modelling
14:00 – 15:45 / 26 October 2017 / Room Alexander 3 / Session chair: J. Fortmann (HTW Berlin, Germany)

Generalized Reduced Order Modelling of AC-DC-AC Converters with Application to Fault Diagnosis
N. Goldschmidt, S. Betker, H. Schulte (University of Applied Sciences (HTW) Berlin, Germany)

Practical Experiences in Developing and Using a Wind Turbine Model based on IEC 61400-27-1
D. Masendorf, E. Tröster (Energynautics, Germany)

Control Hardware-in-the-Loop Simulation for Turbine Impedance Modelling and Verification
G. Li (China Electric Power Research Institute, China), J. Sun (Rensselaer Polytechnic Institute, USA)

Co-simulation and Dynamic Model Exchange with Consideration for Wind Projects
M. Cvetković, H. Krishnapa, C. David, López, R. Bhandia, J. Rueda Torres, P. Palensky (TU Delft, Netherlands)
Session 6A: Forecasting
16:15 – 18:30 / 26 October 2017 / Room Alexander 1 / Session chair: N. Menemenlis (Hydro Québec/IREQ, Canada)

IEA Wind Task 36 Forecasting
G. Giebel (DTU, Denmark), J. Cline (Department of Energy, USA), H. Frank (Deutscher Wetterdienst, Germany), W. Shaw (Pacific Northwest National Laboratory, USA), B.-M. Hodge, C. Draxl (National Renewable Energy Laboratory – NREL, USA), P. Pinson, J. Messner (DTU, Denmark), G. Kariniotakis (MINES ParisTech, France), C. Möhrlein (WEPROG, Denmark)

Impact of Targeted Measurements and Advanced Machine Learning Techniques on 0-3 Hr Ahead Rapid Update Wind Generation Forecasts in the Tehachapi Wind Resource Area
J. Zack, S. Young (AWS Truepower, USA)

Forecasting Available Wind Power for Grid Regions
A. Zien, O. Steinert, J. Rosenkranz, U. Focken, M. Lange (energy & meteo systems, Germany)

Wind Power Forecasting Performed by Operador Nacional do Sistema Elétrico – ONS

Swedish Wind Power Forecasts: Procedure, Error Distribution and Spatio-Temporal Correlation
L. Herre, T. Matusciulis, L. Söder (KTH Royal Institute of Technology, Sweden)

Uncertainty Forecasting Practices for the Next Generation Power System
C. Möhrlein (WEPROG, Denmark), R. Bessa (INESC, Portugal), G. Giebel (DTU, Denmark), J. Jørgensen (WEPROG, Denmark), G. Giebel (DTU, Denmark)

Breakthrough Accuracy of Shorter-Term Power Forecasting Using Deep Learning
W. S. Wadman, A. Deng, G. V. Maniachari, Y. Kim, (Utopus Insights, USA)

Session 6B: Inertia Issues I
16:15 – 18:20 / 26 October 2017 / Room Alexander 2 / Session chair: K. Summers (Pacific Hydro, Australia)

A Survey on Inertia Related Challenges and Mitigation Measures
E. Ørum (Energinet, Denmark), M. Kuivaniemi, L. Haarla, M. Laasonen (Fingrid Oyj, Finland), A. Jerkø, I. Stenkløv (Statnett, Norway), F. Wik, R. Eriksson, N. Modig, K. Elkington (Svenska kraftnät, Sweden), P. Schavemaker (E-Bridge Consulting, Netherlands)

Grid Frequency Extreme Event Analysis and Modelling
M. Folgueras, E. Wenger, A. Florita, K. Clark, V. Gevorgian (National Renewable Energy Laboratory – NREL, USA)

ERCOT Future Synchronous Inertia Projections
J. Matevosyan, C. Anderson, W. Li (ERCOT, USA)

Emergency Islanding Scenario with df/dt-based Inertia Emulation, different Load Types and additional Load Control
T. Rump, H.-G. Eckel (University of Rostock, Germany), D. Duckwitz, C. Glöckler (Fraunhofer IWES, Germany)

Transient Energy Sources to Support Renewable Energy Conversion Systems
N. Schofield (University of Huddersfield, United Kingdom)
### Session 6C: Grid Code Issues

16:15 – 18:00 / 26 October 2017 / Room Alexander 3 / Session chair: TBA

**The Underestimated Relevance of Wind Turbine Fault Ride Through – Review of International Requirements, Current Performances and Future Capabilities**

R. Ogiewa (ENERCON, Sweden), M. Fischer (ENERCON Canada, Canada), S. Nikolai, I. Mackensen (WRD Wobben Research and Development, Germany)

**PLL Dynamics in Low Inertia Weak Grid**

Y. Sun, E. de Jong (Eindhoven University of Technology | DNV GL, Netherlands), W. Kuipers (DNV GL, Netherlands), X. F. Wang, F. Blaabjerg (Aalborg University, Denmark), V. Cuk (Eindhoven University of Technology, Netherlands), J. Cobben (Eindhoven University of Technology | Alliander, Netherlands)

**Bandwidth Requirements for Accurate Flicker Measurements in Wind Turbines during Switching Operations**

K. Redondo, I. Azcarate, J. J. Gutierrez, P. Saiz, L. A. Leturiondo (University of the Basque Country – UPV, Spain)

**On the Inability of the Short-Circuit Current Calculation Standard IEC 60909-0:2016 to Reflect German Grid Code Requirements in the Negative Sequence for Power Station Units with Full Size Converters**

B. Weise, M. Zhao, N. Wilson, S. Weigel (DigiSILENT, Germany)

### Session 7A: Harmonics II

09:00 – 10:40 / 27 October 2017 / Room Alexander 1 / Session chair: J. Sun (Rensselaer Polytechnic Institute, USA)

**Harmonic Requirements of International Grid Codes and Assessment of Harmonics for Wind Power Plants**

I. Szczesny, R. S. Nielsen, F. Martin, L. Shuai, (Siemens Gamesa Renewable Energy, Denmark), T. Dreyer (Siemens Wind Power, Germany)

**Using Prevailing Angle of Harmonics to Distinguish between Background Noise and Emission from a Turbine**

L. S. Christensen, J. G. Nielsen, T. Lund (Vestas Wind Systems, Denmark)

**Evaluating the Influence of the Grid’s Background Distortion on the Wind Turbine’s Harmonic Emission**

M. El Ghouti, T. Heesch (DNV GL, Germany)

**Probabilistic Harmonic Modelling of Wind Power Plants**

E. Guest (Technical University of Denmark, Denmark | Siemens Wind Power, Denmark), K. H. Jensen (Siemens Wind Power, Denmark), T. Rasmussen (Technical University of Denmark, Denmark)

**On Aggregation Requirements for Harmonic Stability Analysis in Wind Power Plants**

M. K. Bakhshizadeh, J. Hjerrild, Ł. Kocewiak (DONG Energy Wind Power, Denmark), F. Blaabjerg, C. L. Bak (Aalborg University, Denmark)

### Session 7B: Inertia Issues II

09:00 – 10:40 / 27 October 2017 / Room Alexander 2 / Session chair: P. W. Christensen (Vestas, Denmark)

**Optimization of Inertial Response from WPPs in Power Systems with High Wind Power Penetration**

J. Kuhlmann, M. Altin, A. D. Hansen (DTU Wind Energy, Denmark)

**Wind Power Plant Level Testing of Inertial Response with Optimized Recovery Behavior**

P. Godin, M. Fischer (ENERCON Canada, Canada), H. Röttgers, A. Mendonca, S. Engelken (WRD Wobben Research and Development, Germany)

**Limitations for the Continuous Provision of Synthetic Inertia with Wind Turbines**

A. Gloe, C. Jauch (University of Applied Science Flensburg, Germany), B. Craciun, J. Winkelmann (Suzlon Energy, Germany)

**Field Experience with Synchronous Wind Turbines in New Zealand and Scotland**

G. Henderson (Windflow Technology, New Zealand)

**Investigation of the Frequency Response of an All Converter-based Generation Power Grid Using a Stochastic Simulation Framework**

D. Ramasubramanian, E. Farantatos, A. Tuohy (Electric Power Research Institute – EPRI, USA), V. Vittal (Arizona State University, USA)
Session 7C: – Integration Examples

09:00 – 10:40 / 27 October 2017 / Room Alexander 3 / Session chair: A. Estanqueiro (LNEG, Portugal)

Integrating Energy Storage Solutions into Wind Power Plants: the Faroe Islands Case Study
D. McMullin, B. Lenz, D. Gamboa, E. Quitmann, J. Anderlohr (ENERCON, Germany), T. Nielsen (Eifelagíð SEV, Faeroe Islands)

Modular Multilevel Converter with Energy Storage System for Grid Support Services in Wind Farms – Main Features and Computational Simulations
S. Rodríguez González (GPTech, Spain), P. Carlos, P. Castro (EDP – NEW R&D, Portugal), B. Silva, J. Aguiar (INESC TEC, Portugal)

Integrating High Shares of Variable Renewable Energy in Costa Rica
P.-P. Schierhorn, T. Ackermann (Energynautics, Germany), F. Fernandez (DigSILENT, Germany), C. Echevarría Barbero, J. R. Paredes, C. Tagwerker (Inter-American Development Bank IDB, USA/Costa Rica)

Enhancing the Value of Wind and PV Generation through Optimal Aggregation
A.R. Machado, A. Couto, J. Duque, A. Estanqueiro (LNEG, Portugal)

Session 8A: Frequency Issues

11:10 – 13:00 / 27 October 2017 / Room Alexander 1 / Session chair: TBA

A Statistical Method for Aggregated Wind Power Plants to Provide Secondary Frequency Control
J. Hu, C. Ziras, H. W. Bindner (DTU, Denmark), X. Han (National Development and Reform Commission, China)

Frequency Support from OWPPs connected to HVDC via Diode Rectifiers
O. Saborío-Romano, A. Bidadfar, Ö. Göksu, M. Altin, N. A. Cutululis (DTU, Denmark)

Coordinated Frequency Control by Inertial Response of Wind Power and Electric Vehicles in Japanese Power System
J. Qi, T. Tsuji (Yokohama National University, Japan)

Impact of Large Scale Integration of Wind Inertia on Power System Frequency Stability
R. Denninger, P. Dubucq, G. Ackermann (Hamburg University of Technology, Germany)

Session 8B: Grid Integration Studies II

11:10 – 13:00 / 27 October 2017 / Room Alexander 2 / Session chair: TBA

A Quantitative Method for Evaluation of Variation Management Strategies for Integration of Variable Renewable Electricity
V. Johansson, L. Thorson, L. Göransson (Chalmers University of Technology, Sweden)

Experimental Stability Assessment of Converter-Dominated Electrical Grids
L. Reguera Castillo, A. Roscoe (University of Strathclyde, United Kingdom)

Following the Demand by Using Stratagical Wind and Solar Complementarity – the Case of Portugal
A. Couto, J. Silva, A. Estanqueiro (LNEG, Portugal)

Impact of Climate Change on a Future Highly Renewable European Power System
M. Schlott, A. Kies, T. Brown, D. Schlachtberger, J. Hoersch, S. Schramm (Frankfurt Institute for Advanced Studies, Germany), M. Greiner (Aarhus University, Denmark)
### Session 8C: Grid Operation Tools

**11:10 – 13:00 / 27 October 2017 / Room Alexander 3 / Session chair: N. Cutululis (DTU, Denmark)**

**Demand Side Response in Multi-Energy Sustainable Systems to Support Power System Stability**  
V. García Suárez, P. Ayivor, J. L. Rueda Torres (Delft University of Technology, Netherlands), M.A.M.M. van der Meijden (Delft University of Technology | TenneT TSO, Netherlands)

**Can Benchmarks and Trials Help Develop new Operational Tools for Balancing Wind Power?**  
C. Möhrleen (WEPROG, Denmark), C. Collier (DNV GL, USA), J. Zack (AWS Truepower, USA), J. Jørgensen (Vaisala, USA)

**Active Power Control for Mitigation of Short-term Fluctuation of Wind Power**  
C. T. Urabe, T. Saitou, K. Kataoka, K. Ogimoto (University of Tokyo, Japan), T. Ikegami (Tokyo University of Agriculture and Technology, Japan)

**Loss-Reduced Reactive Power Control Strategies for Transmission System Support with Renewable Energy Sources**  
H. Köppe, B. Engel (Technical University Braunschweig, Germany), R. Grab, S. Rogalla (Fraunhofer ISE, Germany)

**Improving the Reactive Power Balance between a German MV and HV Grid through Coordinated Reactive Power Provision by Wind Power Plants**  
L. Hülsmann, E. Tröster (Energynautics, Germany), U. Ohl, M. Koch (EWR Netz, Germany)

### Session 9A: Wind Power Developments

**14:00 – 15:15 / 27 October 2017 / Room Alexander 1 / Session chair: N. Martensen (Energynautics, Germany)**

**Implementation of Current Signature Analysis to Monitor DFIG Wind Turbines**  
E. Artigao (Renewable Energy Research Institute – IIER, Spain), A. Honrubia-Escribano, E. Gomez-Lazaro (University of Castilla – La Mancha, Spain)

**Limit Voltage Dips & Inrush Currents When Energizing Power Transformers – Controlled Switching of Gang Operated Switches — Theory and Case Study**  
P. Taillefer, L. Poutrain (Vizimax, Canada), J. Sanchez (France)

**The Evolving Role of Simulation and Data Analytics in Wind Power System Development and Operation**  
G. Dudgeon (MathWorks, USA), G. Schraberger (MathWorks, Germany)

### Session 9B: German Sinteg Projects

**14:00 – 15:15 / 27 October 2017 / Room Alexander 2 / Session chair: TBA**

**Overview of SINTEG Projects Germany**  
M. Kurt (Tennet, Germany)

**DESGIENetz – Toolbox Energy-Transition – From Individual Solutions Towards an Efficient System for the Future**  
E. Wagner, T. Wiedemann (Designetz/Westnetz, Germany)

**TBA**  
N.N.

### Session 10: Closing Session – Panel Discussions

**15:30 – 16:30 / 27 October 2017 / Room Alexander 1 – 2 / Session chair: TBA**

The contributions and discussions of this session are not part of the proceedings.

### Poster Presentation Papers

**597**

### Workshop Participants

**687**
